DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 are drawn to a directly modulated, distributed feedback laser having an output beam responsive to the application of an input biasing current, classified in class 372, subclass 29.015.
- II. Claim 8 is drawn to a method of creating a laser, classified in class 438, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the method of creating a laser can be used to create a different kind of semiconductor device.
